

Protective Cream for Wood Countertops

Product # 001212

DESCRIPTION

New protective cream for wood countertops and cutting boards. This all-natural formula is based on a combination of unbleached beeswax and food-grade mineral oil. It penetrates deeply into the grain of the wood, leaving a silky wax barrier and locking moisture in.

Used regularly, this cream will help to replenish the moisture lost from repeated washings and keep your countertop, butcher block, or cutting board from drying, bleaching, and cracking.

TECHNICAL SPECIFICATIONS
